

These notes are taken during the triweekly lectures for [18.212 Algebraic Combinatorics](#), taught by Professor Alexander Postnikov in Spring 2025. Each PDF file encompasses notes from multiple lectures that cover related topics.

They are typeset in Obsidian with several plugins, particularly [LaTeX Suite](#) and [LaTeX-like Theorem & Equation Referencer](#). Diagrams are drawn on <https://cocreate.csail.mit.edu/> (and occasionally <https://app.diagrams.net/>).

If there are any mistakes, formatting errors, parts that are unclear, etc in the notes, please contact me (Marvin Mao) at mm28@mit.edu.
